

Innovation in Music 2015

R.Hepworth-Sawyer, J.Hodgson, J.L.Paterson and R.Toulson (Eds.)

The music industry is a rapidly evolving field, with new creative approaches and technological advances combining to catalyse and inspire innovations. Innovation in Music 2015 (InMusic'15) was an international conference organised by KES International and hosted by Anglia Ruskin University over the 7th to 9th June 2015 in Cambridge, UK.

Innovation in Music broadly represents all aspects of innovation in the field of music, particularly encompassing music performance, audio technology, music production and the commercial music industries. The conference acted as a forum for industry experts and professionals to mix with researchers and academics to report on the latest advances and exchange ideas.

Award-winning industry experts including David Wrench, Tim Exile, Peter Jenner, Mandy Parnell, Gary Bromham, Bryan Martin and Simon Gogerly contributed to the conference keynote presentations. This volume includes articles developed from presentations delivered at the conference and subsequently invited for peer-reviewed inclusion as chapters in the text. It also contains the transcript of the music production keynote interview with mix-engineer David Wrench, who was recently award the UK Music Producers' Guild award for 'Mix Engineer of the Year'. This book therefore gives a broad and detailed overview of modern and cross-disciplinary innovations in the world of music.
